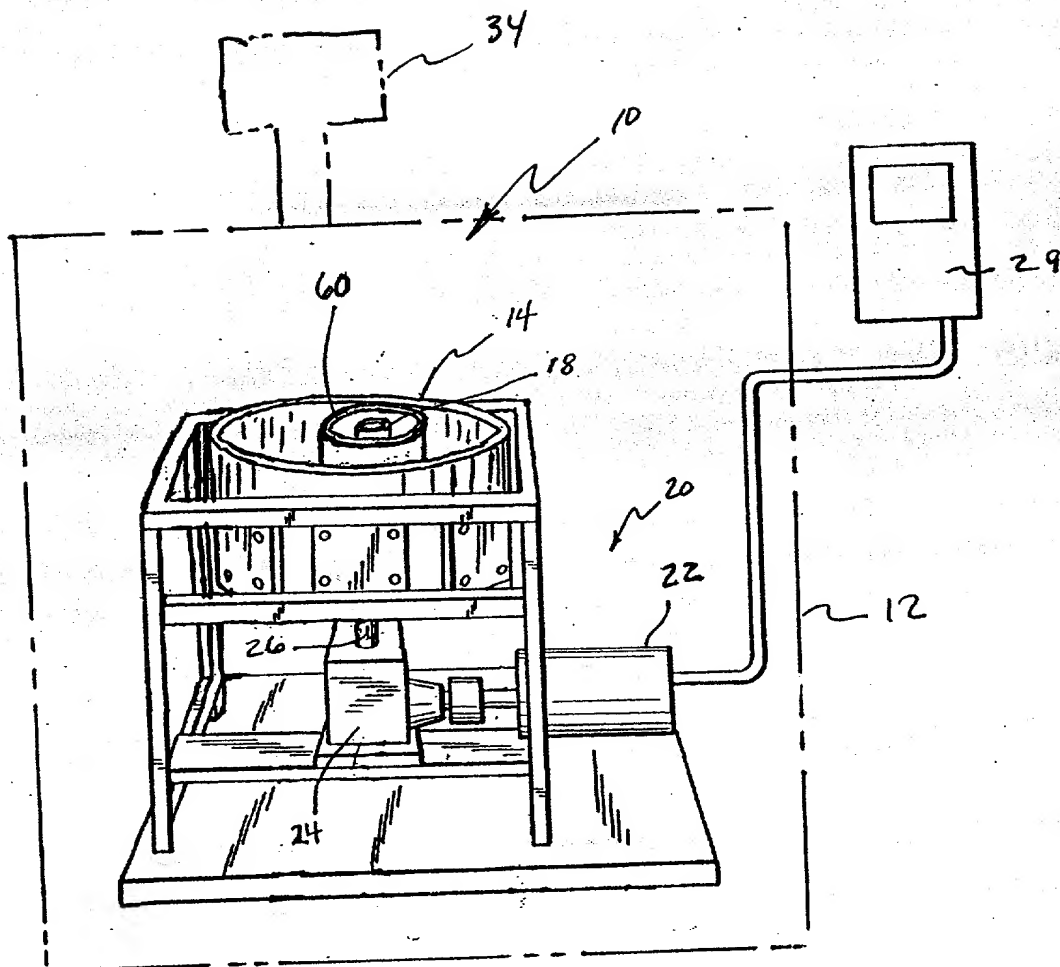

FIG. 6

Figure 1 shows the results of the first two experiments. The first experiment was a 2 (number of stimuli)  $\times$  2 (number of trials)  $\times$  2 (number of subjects) factorial design. The second experiment was a 2 (number of stimuli)  $\times$  2 (number of trials)  $\times$  2 (number of subjects) factorial design. The results of the first two experiments are shown in Figure 1. The first experiment was a 2 (number of stimuli)  $\times$  2 (number of trials)  $\times$  2 (number of subjects) factorial design. The second experiment was a 2 (number of stimuli)  $\times$  2 (number of trials)  $\times$  2 (number of subjects) factorial design. The results of the first two experiments are shown in Figure 1.
